**The star performers
on wet and dry roads!**

XP 2000 EURO

With their optimised groove and sipe technology, developed for wide ranging European road conditions, the XP2000 Euro tyres provide safe and predictable handling in both wet and dry conditions.

The XP2000 Euro comes in two different designs: a traditional non-directional pattern for the T speed index and a sportive V-shaped directional pattern for the H/V/W speed indexes.

Vehicle Examples

AUDI	MERCEDES
BMW	PEUGEOT
FIAT	RENAULT
FORD	TOYOTA
HONDA	VOLKSWAGEN

XP2000 EURO T EURO H/V/W

GENERAL TIRE

XP 2000 Euro - The guarantee for top performance

Their tread patterns are characterised by a combination of longitudinal, lateral grooves and multiple highly siped blocks, giving the tyres their excellent handling and braking performance on both wet and dry roads.

XP 2000 Euro T:

- Three longitudinal drainage grooves
- Cross over lateral grooves
- Multiple blocks and sipes
- Central tread band

XP 2000 Euro H/V/W:

- Extended grooves from centre to shoulder
- Five longitudinal tread grooves
- Stiff shoulder blocks with additional sipes
- large tread block

Features & Benefits XP2000 Euro T

- 1 Three (two extra-wide) longitudinal drainage grooves and cross over lateral grooves for fast water clearance
- 2 Multiple blocks edges and sipes for excellent wet braking capabilities
- 3 Stiff blocks for enhanced handling and dry braking
- 4 Central tread bands for stability and steering precision
- 5 Computer designed radial belt construction reducing the vibrations and optimised block sequence reducing the noise level, for better drive comfort
- 6 Advanced rubber compound for high mileage and grip

Features & Benefits XP2000 Euro H/V/W

- 1 Extended grooves from centre to shoulder and five longitudinal tread grooves for improved safety in wet conditions and reduction of the risk of aquaplaning
- 2 Stiff blocks for enhanced handling and dry braking
- 3 Large tread blocks for high speed stability and fast handling response
- 4 Computer designed radial belt construction reducing the vibrations and optimised block sequence reducing the noise level, for better drive comfort
- 5 Advanced rubber compound for high mileage and grip
