

Innovative. Quick. Simple.

The Industrial Tyre Revolution Super Elastic Tyre fitting with no press

CSEasy is the first Super-Elastic tyre that requires no fitting press. Two hands and a torque wrench are all you need.

Press-less fitment

An innovative adapter sits between the tyre and the rim. Thanks to its conical shape, the tyre is already in position for direct fitment onto the rim using a system of screws fastened with a torque wrench.

More flexibility

- No press required, fitted in situ with no time delay
- No need to hold rims in stock, no exchange system, no special tools
- Easy fitting – two hands and a torque wrench is all you need
- Adapter can be reused several times

More performance

Real operational benefits compared to conventional Super-Elastic tyres: optimised fit, durability, rolling resistance, energy consumption, steering reaction, stability and reduced heat build-up.
