

Fresh snow on the road

Ski-ing equipment on board

A steep upward climb

Icy road

Stays on track beautifully

NEW!

Good track holding in snow and ice.

The new Master-Grip

Designed for compact cars, the Semperit Master-Grip stays safely on track, even under extreme winter conditions. Superior performance, thanks to grip, lateral guidance and long service life.

SEMPERIT 
Entire Performance.

Master-Grip – The superior performer

The new Semperit Master-Grip was designed according to the latest tyre development methods. Constant optimisation of the tyre sipe systems, the rubber compound and the tread pattern design make the Master-Grip superior on wintry roads.

Impressive safety in snow and ice.

Outstanding traction in snow and reduced braking distances on icy roads, thanks to networked, rectangular sipes.

Effect: The gripping edges interlock with the wintry ground.

High mileage performance with consistently high grip.

Constant grip in snow and ice throughout the entire service life of the tyre, thanks to rubber compound with anti-frost polymers.

Effect: High tread flexibility, even in harsh frost.

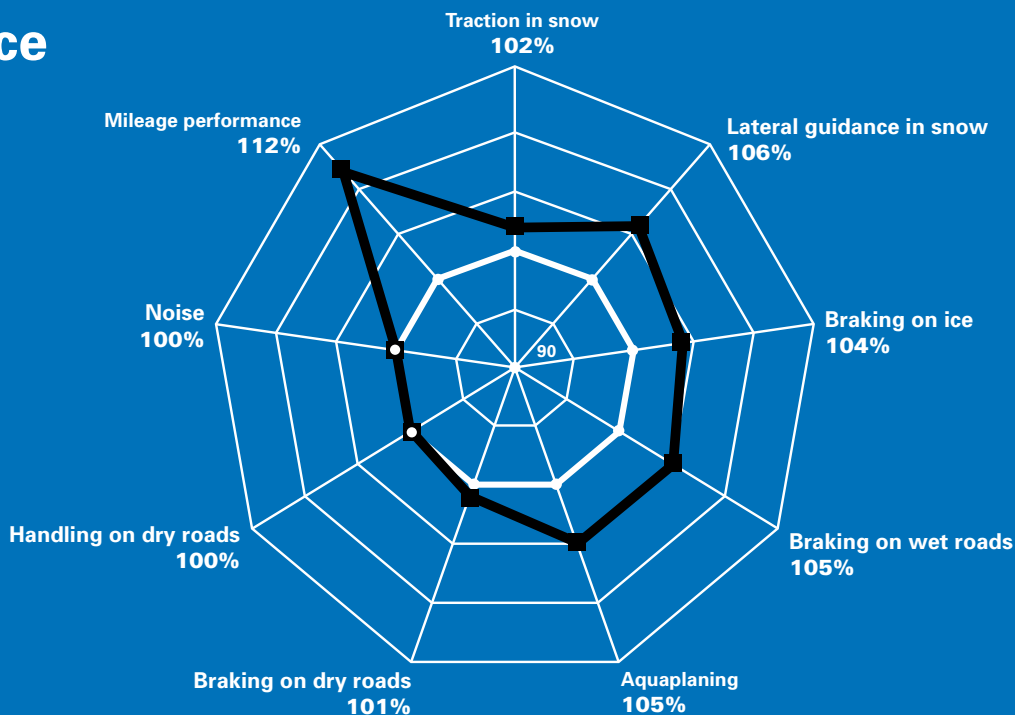

Maximum safety in the wet.

High aquaplaning protection, thanks to the many lateral sipes and large grooved tread area.

Effect: Efficient water displacement and dispersion.
