MPT Tires from Continental

Multi-Purpose Tires, or MPT, are designed for mixed on-/off-road use with a strong emphasis on tough conditions. The flexible carcass allows for both high speed on-road and rough-ground off-road operations. MPT Tires are often used on military vehicles because of their ability to cope with unpredictable operating conditions. They are also ideal for construction, road maintenance/clearance and general usage.

Environment

Continental takes responsibility for the environment, the climate, nature and the recycling of resources. Continental tires are free of Nitrosamine and Polycyclic Hydrocarbons (aromatic oils which have been used for tire production and are believed to cause cancer).

Continental tires have long lifetime – less tire usage means less disposal. **Continental tires have low rolling resistance** – low rolling resistance means lower vehicle energy consumption and lower emission. **Continental radial tires have tubeless construction** – repairable tires means less tire disposals.

Quality

Continental customers can rely on certified quality. The quality management at our international production and service sites has been audited and fully approved to conform to ISO 9001-2000 (2nd edition, 2002-03-01) requirements.

Total Cost of Ownership (TCO)

Continental strives to offer customer solutions designed to reduce the overall cost of operation – realizing that the purchase price is really only one cost component of many. Continental promotes transparency of the Total Cost of Ownership, offering a cost advantage over competitors on the combined basis of purchase price, mileage, rolling resistance, energy consumption and service.
